(54) PICTURE INFORMATION TRANSMISSION SYSTEM, PICTURE INFORMATION  
RECORDED AND PICTURE INFORMATION REPRODUCTION DEVICE

(57)Abstract:

PURPOSE: To attain not only permission/inhibition of copying but also generation limit of a copy by superimposing copy right information and generation information and sending the result together with picture information for a period other than a valid video image period displayed on a screen of the picture information.

CONSTITUTION: Copy right information S1 in 1-bit indicating presence of a copy right in a level '1/10' is superimposed on a 20th line (20th line of an odd number field) and generation information S2 in 1-bit indicating number of generations available for copies in a level '0/1' is superimposed on a 283rd line (20th line of an even number field) with respect to an NTSC video signal and the NTSC video signal and the copy right information S1 and the generation information S2 are sent alternately for each field. Thus, field discrimination

based on a horizontal synchronizing signal and a vertical synchronizing signal is executed as to the received NTSC system video signal at the receiver side and the copy right information S1 is detected from the 20th line of an odd number field and the generation information S2 are detected from the 20th line of an even number field.

ABSTRACTED-PUB-NO: JP2002034014A

BASIC-ABSTRACT:

NOVELTY - The image information is produced based on the paid fee. A processor adds the threshold frequency for copy of image which is decided based on the paid fee, to the image information. An external terminal equipment receives the moving image information from the user through an interface.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

(a) Image communication terminal;

(b) Image delivery server;

(c) Image information providing system

USE - For portable multimedia terminal.

ADVANTAGE - As image input function is separated from transmitting terminal, size reduction of a terminal and increase of lifetime of a terminal battery are achieved.

DESCRIPTION OF DRAWING(S) - The figure shows the block diagram of the multimedia data communication device. (Drawing includes non-English language text).

CHOSEN-DRAWING: Dwg.6/28

TITLE-TERMS: IMAGE INFORMATION PRODUCE APPARATUS PORTABLE TERMINAL PROCESSOR ADD THRESHOLD FREQUENCY COPY IMAGE DECIDE BASED PAY FEE IMAGE INFORMATION
